The importance of Physical Fitness

Why is Physical activity and fitness important?

There are some advantages when we get fitters.

Some of them are:

Physical activity is essential to prevent and reduce risks of many diseases and improve physical and mental health. It can even help you live longer - research from the American Journal of Preventative Medicine indicates that regular exercise can add up to five years to your life.

Physical activity also keeps you in shape so you can enjoy leisure activities and safely perform work and home chores. It offers great mental and social benefits as well. The Lancet released a series of studies that attribute positive outcomes to physical activity, including "a sense of purpose and value, a better quality of life, improved sleep, as well as stronger relationships and social connectedness".

On the other hand, lack of physical activity is associated with increased risks of health problems.

Firstly, it is important to provide healthy environment. When the trash is not managed well, it will create area where bacteria can live.

Moreover, it can cause some health issue, and breathing issues become one of them that can be caused by bad smell of the trash. Furthermore, bad management of trash can lead to flood. When it is not managed well, trash can block the flow of water.

As the result, water debit can increase during the rainy season and the channels of waters cannot deliver the water well. That is why it is very important to manage the trash and it is better to promote the recycling process.

Drug Abuse

Narkoba stands for narcotics, psychotropics, and illegal drugs. Another term introduced in Indonesia by the Ministry of Indonesia is RAZPA which stands for narcotics, psychotropics, and addictive substances.

Arguments: In modern times like today, many teenagers do not get supervision from their parents, this is one of the factors for drug abuse in their teens, drug abuse does not occur at the age of teenagers, many are mature, drug abuse such as shabu-shabu, ecstasy pills, medicine. Several factors for drug abuse are the lack of parental attention, lack of awareness of the risks in adolescents, wanting to find their own pleasure, and lack of self-control to resist the desire not to try.

So we know that drugs are not good for our bodies, it will only make losses. We as the nation's successors must stay away from drugs.
