Submission Title: Analyzing the Adoption of Clean and Healthy Living Behaviors against COVID-19 Students in Indonesia

Dear Dr. Tri Niswati Utami,

Thank you for your submission to "The Open Public Health Journal". It will be sent to the Editor-in-Chief for his initial provisional approval. Once this is obtained it will be passed on to our Author Support Services department (BASS), for an initial assessment of the manuscript. BASS is a specialized department that helps authors and editors to make sure that the manuscript becomes ready for submission into the peer-review process. The manuscript is being processed on the clear understanding that it contains original work that has neither been published earlier nor has it been simultaneously been submitted for publications elsewhere. In case this is not so, then kindly let us know immediately.

Please note that Bentham Open uses **Cross Check's iThenticate** software to check for similarities between the submitted and already published material to minimize any chances of plagiarism.

Further, as per Bentham Open's Ethical Guidelines for Publication, all manuscripts are processed with the understanding that all authors and co-authors have reviewed and accordingly

Dear Dr. Tri Utami,

We are pleased to inform you that your article entitled, "**Analyzing the Adoption of Clean and Healthy Living Behaviors against COVID-19 Students in Indonesia**" has been initially approved by the Editorial Advisory Board of the journal "**The Open Public Health Journal**". to proceed further.

This is to inform you that currently your article is under editorial evaluation by Bentham Author Services Support (BASS) editors.

The Bentham Authors Services Support (BASS) editors consist of competent professionals who perform detailed, initial scrutiny of all submitted manuscripts. to assist authors in fine-tuning their manuscripts. This will help reduce the errors that may delay the review and publication process later. The core aim of the BASS editors is to ensure the complete, correct, and concise incorporation of all details needed at the initial stage, to ensure smooth and timely processing of the article to the peer-review stage.

Your article will be evaluated by the BASS editors for the following things:

- \* Language editing
- \* Figure quality checking/enhancement
- \* Reference duplication-checking/formatting
- \* Quality Control (Plagiarism/ Similarity Checking)
- \* Ethical protocols and overall text organization
- \* Citation of References / Figures / Tables etc.
- \* Selection of right category/nature of the article
- \* Funding details/acknowledgement etc.

Please note that on successful completion of this initial review, your article will then be subjected to a rigorous and neutral peer-review process, before an acceptance decision can be taken.

Thanks and Regards,  
Editorial Office

Authors who are native English speakers should ensure that their article has been carefully checked for language, grammar, and style (where appropriate). This is in your interest as it will substantially reduce the time taken for the publication of your article.

**\*References:** References should be provided exactly in the journals specific format.

**Note:** Please make sure to submit your revised manuscript through our Journal Management System <https://bentham.manuscriptpoint.com/> otherwise it may face delays in processing.

**Reviewer Comments:**

**Referee 2:**  
The author should cite at least 10 more related SSCI journal articles, say it may be related to covid. Section 2 needs citation, such as previous research that utilised survey as a research method, previous research that studied latent variables. What are the sampling method? Conclusion needs to extend by at least three more paragraphs, illustrate the practical, policy and academic contributions as well as the research gap that it filled.

**Referee 3:**  
Restructure the abstract as per journal's requirement. 2. Reconstruct the sentence- 'This review summarizes the information on distribution, chemical synthesis and biosynthesis, bioactivities and MS fragmentation regularity of DKPs, to provide a reference for exploring future scientific and therapeutic potentials.' 3. Specify the timeframe of data collected in the review. Although it is mentioned in the last paragraph of introduction section. But, it is suggested to write in the abstract. 4. In the introduction section, elaborate the plant source of DKP's. Is it only found in the few plants like- Portulaca oleracea, Schisandra chinensis, Ophiopogon japonicas, and Ganoderma lucidum. Briefly describe the procedure of obtaining DKPs from the plant sources. 5. Uniformly use the word Figure or Fig. throughout the manuscript. 6. The chemical synthesis can be better explained using the chemical reactions while the biological synthesis should be explained with the help of figure. 7. All the chemicals structures included in the MS should be drawn using authentic chemical structure drawing software. Modify all the figures. Don't use the jpeg form. 8. Proper citations of tables and figures should be there in the MS. 9. Check all the references for its authenticity. 10. Many grammatical errors including punctuation error should be removed.

Sincerely,

Ambreen Irshad
