CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

In line with the findings and discussion of this research, the conclusion can stated as follows:

1. There were three types of language styles used by the English Education Department students of UINSU in writing their Instagram captions. The types were formal style, consultative style and casual style. The most dominantly used style was consultative style.

2. There were five reasons for English Education Department students of UINSU in using language style in their Instagram capations. They were to express feeling or emotion such as happiness, sadness, anxiety, doubts and etc, to express something in aesthetic features of language by using poem or rhyme, to get something done or to get someone do something for some purposes, to express solidarity or empathy to others, and to provide information. The most dominant reason was to express feeling or emotion (expressive).

B. Suggestion

In line with the conclusions of this research, there were some suggestions can be offered. They were:

1. To other researchers; it was suggested to expand deeper the similar topic with other point of view such as the analysis of language styles in other social media platforms and using quantitative methods.

2. To students; it was suggested to use this research as an additional reference in understanding the types and the reasons for using language styles. It was also suggested that the students to use various language style in their writings.

To the readers; it was suggested to use this research as additional insight on how to use an effective language style so that the communication will be more effective.
