

CHAPTER V

CLOSING

A. Conclusion

Based on the results of the data analysis described above, it can be concluded as follows:

1. Class XII students of SMA Negeri 1 TanjungTiram learn English through online media such as WhatsApp Group, Google Classroom and also Zoom meetings. each of these online media has a function, such as whatsapp groups which are used for communication tools between students and teachers such as providing information and announcements, Google classroom is used for students to fill out attendance lists, send assignments, while zoom meetings are used for students to listen to learning material from teacher .
2. In learning English through online media, students find several obstacles, such as students' lack of understanding in the use of English learning through onlinemedia, such as the use of Google Classroom and Zoom meetings, unstable internet signals, expensive internet quotas and students' lack of understanding in delivering material from teacher.
3. From these problems the researchers found several solutions to the problem of students' lack of understanding in the use of online media, the school should provide special training and when students do not have personal androids, students can gather with classmates who have androids with a maximum of 3 people without violating the process through this as well. Indirectly students also save the use of internet quota, then the school can work with sponsors or volunteer donors to facilitate internet quota or everything needed in learning English.

B. Suggestion

Based on the conclusion above, the researcher hopes that this thesis can be useful for teachers, students, and other researchers.

1. For the Student and Teacher

Researchers hope that students realize that the use of online media in learning English is very important, not in a pandemic situation in the future, the world of education will experience progress, especially technology, so students can have the ability to use technology. besides that the teacher can provide motivation / advice so that students can be enthusiastic in learning English through online media.

2. For the Research

Researchers hope that other researchers can conducting research using media related to learning English in a similar classtotics. Hopefully with more researchers, the results will be more useful to improve the English learning process and will be reviewed by other researchers so that they can complete the shortcomings of this thesis.

3. For the School

The researcher hopes that the school can improve school facilities, especially for learning English through online media. Schools are also expected to be able to solve problems faced by students, so that the objectives of learning can be achieved properly
