Kepada: Prof. Dr. Andrejs Skesters <editor@eurchembull.com>

Dear Editor  
ECB Journal

I have read and use scientific articles published in ECB Journal.

The performance of the ECB Journal was excellent, and the article published helped me in conducting research and writing scientific articles.

I am Sudirman Suparmin, Lecturer from State Islamic University of North Sumatra, Medan, Indonesia

I have completed a scientific article entitled *"Temettok Custom: Exploring the Walimah Al-'Ursy Tradition that is Starting to Fade in Aceh Singkil based on the Perspective of 'Urf."*

I hope this article can be published in the ECB Journal, because there are interesting findings in the scientific article that can become new treasures in sciences, especially in the field of health sciences.

I am willing to go through the review process following ECB Journal standards.

Best Regards,

Sudirman Suparmin  
State Islamic University of North Sumatra, Medan, Indonesia

ECB Journal values your contribution and I look forward to receiving your revised manuscript.

Editor and Reviewer comments:

Reviewer #1:

1. The paper has some interesting information, and the topic is essential; however, there seem to be some basic questions suggesting flaws in the questionnaire which put the conclusions in question.
2. The English in parts approaches being incomprehensible so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review refers to engaging experience and studies elsewhere, but it is not well linked to the research and therefore, the conclusions.
4. The paper's focus is more apply on Indonesia Only, how about other countries and the questionnaire.
5. There should be more information about the object of research, not about the content of the study.

I hope your team can make improvements as soon as possible, and send the revised article again via this email.

Dear

Sudirman Suparmin  
State Islamic University of North Sumatra, Medan, Indonesia

Thank you for your efforts to make improvements to your article.

Based on Reviewers' considerations, the article has, at some point, increased.

However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
2. The literature review includes some tantalizing references, but even after sorting through the language issues, the links are not made to the specific study.
3. They when study design comes into play there are serious questions about the system.
4. If the author could work with a robust English language editor or colleague to clean up both language and argument, it might be publishable.
5. A side note is that it's not at all clear what the title references the article.

Articles that have been revised and please send it back via this email.
