

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

From the data obtained it is seen that the result of groupwork and individual method to the students' at grade VIII students' of SMP Cerdas Murni Tembung were significance to be used in improving the students' ability comprehending reading material. Result of t-test is 6,26 and t-table is 1,986 ($t\text{-test} > t\text{-table}$, $6,26 > 1,986$). It means that H_0 is rejected and H_a is accepted. There is the effect of groupwork and individual method on the students' ability at comprehending reading material.

5.2 Suggestion

In relation to the research findings, the writer suggests to:

1. The Principal of SMP Cerdas Murni Tembung to motivate the educators especially the English teachers able to use the best method in teaching process, especially in comprehending reading material.
2. To English teachers to increase the students' ability especially to motivation and knowledge to the them, add informasion about comprehending reading material for them, the students' could to memorize the vocabulary and can interpret of that vocabulary what they was read. And the last to improve the quality of teaching and learning program. So, teaching learning process can be effective.
3. The students have to obey to the teachers' role and study hard to increase their achievement, especially in comprehending English text. More active and creative learning and the raeder as input for them when someday they to field or teaching English in the class.
4. Other researchers to be presumably can add the variable and broaden the sample so that this research can be studied more circumstantial later.
