Advisor I : Dr.H.Amiruddin, MS, MA, MBA, PHD
Advisor II : Siti Ismahani, M.Hum
Title : The Effect of Reward and Punishment in Students Speaking Skill at X Grade Student MA Islamic Boarding School of Darul Quran Medan Tembung
Thesis : Tarbiyah faculty UIN-SU of North Sumatera
Motto : Be Whatever You Want

Key Words : Reward And Punishment, Students Speaking Skill.

This research was intended to find out the effect of Reward And Punishment on the Students’ Speaking Skill at Grade X at MA Islamic Boarding School of Darul Quran Medan Tembung. The population of this research were the class X - 1, X - 2, X-3, X - 4 , and X-5 . The samples of this research were taken from 35 students of experimental group (class X-4) and 35 students of control group (class X-5). The data obtained were quantitative. The instrument for collecting data were pre-test and post-test. In the finding, researcher analyzing by t-test. After analyzing the data, the researcher got; (1) the students learning by Reward and Punishment on the Students’ Speaking Skill got the mean 80 and standard deviation was 208,2; (2) The students’ learning by conventional method on Speaking Skill got the mean 63,71 and standard deviation was 140,1. The value of $t_{observed}$ was 5.523 and that of $t_{table}$ was 1,56. So the value of $t_{observed}$ was higher than that of $t_{table}$. It means that there was significant effect of Reward and Punishment on the students’ speaking skill.
ACKNOWLEDGEMENT

In the name of Allah, the beneficent, and the merciful. Praise and gratitude be to Allah for the health and strength that has given to the writer in writing this skripsi.

Peace and blessing be upon the Prophet Muhammad Shallallaahu ‘alaihiwa salaam, his family, his relatives, and all his followers.

This skripsi is written to fulfill one of the requirements to obtain the S-1 program at English Department of Faculty of Tarbiyah Science and Teachers Training, State Islamic University of North Sumatera (UIN SU).

In finding the research, the writer encountered some difficulties such as collecting the references, finding the data and especially in analyzing the data. It the writer realized that without much help from numerous people, this thesis wouldn’t finish effectively. That’s why obviously writer would like to thanks to the following people:

1. **Prof. Dr. H. Saidurrahman, M.Ag** as the rector of State Islamic University of North Sumatera (UINSU).

2. **Dr. H. Amiruddin Siahaan, M.Pd** as a Dean of Faculty of Tarbiyah and Teachers’ Training State of Islamic University of North Sumatera and all of the administration staff.

3. **Dr. Sholihatul Hamidah Daulay, S.Ag, M.Hum** as head master of English Department and **Maryati Salmiah, S.Pd, M.Hum** as a secretary for the facilities that given to me during the completion this skripsi.

4. **Dr. H. Amiruddin, MS. MA. MBA. Ph.D** the first advisor who
providing careful guidance, helpful corrections, great advice as well as
suggestion and encouragement during the consultation.

5. **Siti Ismahani, M.Hum** as the second advisor who patiently guided and
helped the writer to finish this skripsi.

6. All lecturers in the English Department for teaching precious
knowledge, sharing philosophy of life, and giving wonderful study
experience.

7. **M. Ansor Batu Bara, S.Pd** as the principal of MA Darul Quran Medan
Tembung, **Zahara Marhamah Siregar, S.Pd.I** as the English teacher
and all students of X class who helped the writer during the research.

8. My beloved father **Amri Tanjung** and my beloved mother **Syahbani
Sitorus**, my beloved siblings **Agus Suherman Tanjung, M. Rais Tanjung, Rima Rahmayani Tanjung, Misbah Aini Tanjung** and all
of my family who always given writer advices, suggestions, and spirits,
so that writer can be finished this final task and also their prayer as the
greatest power on this earth that makes me easy to do this skripsi, big
thanks for your endless love.

9. My beloved Friends in PBI-6 (2015), especially my close friends: **Nur
Mailan Lubis, Ummi Kalsum, Ihda Atira Muis**, and **Rizky Wardani**
as my inspiration in learning, my favorite hello and my hardest good
bye, always support, and pray each other. See you on the top guys!

10. My little family on the overseas: **Haisyah Hasibuan, Lailan Safina
Nasution, Ade Amelia, Atikah Hidayah, Khairunnisa**, and **Ayu
Zahara** who help writer for finishing this skripsi.

12. For all who helped writer and give spirit when doing this skripsi.

May Allah protect and give the great blessing for them. Aamiin.

Finally, the writer realizes that this skripsi is far from being perfect and to suggestion and correction. It is a great pleasure for the writer to receive critics and suggestions in developing this research and it will has some values for the writer and for a better thing in the future. Hopefully this thesis may give the advantages for all.

Medan, 23 Juli 2019

Irma Juwita

CHAPTER I
INTRODUCTION

A. Background of the Study

As international language, English language is also considered as an importance language to be learned. Many people want to develop their speaking skill and make sure their children have good English Speaking. Absolutely, students have to produce and interact the language in any aspects of their daily communication. It is because not sufficient for students to learn only words, phrases and grammatical features if they want to improve their skill. This reality make a teacher thinks that speaking skill should be improved and be mastered by their students. “Indonesian government committed the quality of national education by increasing the quality of students, teachers, curriculum, facilities, and school management for facing globalization era. Students have to develop their communicative skill and student expected to be able in using English language early.”

“English subject in senior high school covers four skills that have to be mastered by students in accordance with the goal of learning English in senior high school. Those skill are listening and reading as the receptive skills and speaking and writing as productive skills. In this case the learners are required to comprehend (listening and reading) the language and produce (speaking and writing) the language. The relationship is before producing the language students.”

According to Chaney, speaking is the process of building and sharing meaning through the use of verbal and non-verbal symbols, in a variety of contexts. Speaking also explain in the Qur’an which in Q.S Ar-Rahman: 1-4.

---

1Masnur Muslich, (2007), KTSP; Pembelajaran Berbasis Kompetensi dan Kontekstual, Jakarta: Bumi Aksara, p. 11.
The meaning:
The beneficent hath. Made known the Qur’an. He hath created man. He hath taught him utterance.  

It is the most important skill to master in order to succeed in expressing ideas, thought and opinion orally, communication takes place, without speaking we cannot communicate with one another.

Speaking is used for many different purposes. Each purpose may be to make social contact with people to express opinions, to persuade someone about something, or to clarify information. Almost all learners in other countries even Indonesian learners study English are still in order to develop proficiency in speaking.

Based on writer found from the microteaching at school of Medan, that from task or practice, the writer found that the students less in English speaking skill. Students less and can not use English in short conversation. Commonly, when they speak English they have no idea about what they are going to say, and then they take so much time to think. It is may be the less of memorizing vocabulary or some of them did not say anything because having less confidence of their own skill and worry about getting wrong then they were laughed by others. The condition of teaching learning were not active, and especially the students look less enthusiastic in learning English further in speaking.

---

Many factors can cause the problem of the students speaking skills, among others the students' interest, the material, the media, and the technique in teaching English. In the Senior High School, must be top in a field that makes the school in the eyes of public. well, in terms of what they propose there must get something that is able to make students' motivation and determination strong in pursuing a standardized goal that can benefit themselves or individually.

To minimize these problems, the writer consider it necessary to find alternative techniques to create suitable and interesting teaching that makes students dare to speak English. Teachers need to help students encourage student anxiety, motivating them to learn better especially helping students to overcome the problem of speaking skills, and they need any practice to help them develop their speaking skills. For this reason, many techniques that can be applied include providing reward and punishment rules to encourage students to actively participate in the learning process and many research findings say that this technique is effectively used in teaching speech. This technique also gives students the opportunity to practice communicating in different social contexts and social roles. In other words, this technique is used to find out the use of English and for habituation will definitely result in speaking fluently. It is important to emphasize that implementing rewards and punishments is one of the techniques to achieve goals in encouraging students to be brave in using English, especially to be brave in speaking English. The writer hope that method can help the teaching learning process be communicative, effective technique in teaching speaking, not make monotonous in learning, and can facilitate students to use the language as means of communication.
Sdorow and Riekabaugh wrote in their book: “Given the everyday observation that extrinsic rewards can increase achievement motivation, especially in people who initially have little or no motivation in a particular area.”

“Punishment is applied following a desired action, as when a student is punished after coming forward to admit cheating on an exam. The student may associate the punishment with being honest rather than with the original offense.”

For these reason, suitable technique should be conducted in order to make students become successful in their speaking skill. Giving rewards and punishment is one of the techniques of teaching learning process that makes speaking’s classroom activity can be effective class and can enhance their understanding and comprehending about speaking material.

Based on the background of study above, the writer would like to conduct a research under the title: “The Effect of Rewards and Punishment in Students’ Speaking Skill at Ten Grade of SMA Islamic Boarding Darul Quran Medan Tembung.

B. The Problems of the Study

1. What is the effect of reward and punishment in students’ speaking skill at X grade of SMA Islamic Boarding Darul Quran Medan Tembung?

2. How is the significant of reward and punishment in speaking skill at X grade of SMA Islamic Boarding Darul Quran Medan Tembung?

---

C. The Purpose of the Study

1. To know the effect of reward and punishment in student speaking skill X grade of SMA Islamic Boarding Darul Quran Medan Tembung.
2. To find out the significant of reward and punishment in student speaking skill X grade of SMA Islamic Boarding Darul Quran Medan Tembung

D. The Identification of the Study

Based on what written in the background of the study about reward and punishment in student’s speaking skill at the X grade of MA of Islamic Boarding school of Darul Quran Medan Tembung, I involve the identification of study are:

1. Most of the students are still less in English speaking skill might less because they might be afraid of being wrong.
2. Most of students are looked less enthusiasm/motivation in learning speaking English.
3. Most of the student might be afraid of being wrong when speaking English.

E. The Limitation of the Study

To avoid misunderstanding and to clarify the study, the writer limits the study of this skrips “In The Effectiveness Of Reward And Punishment In Students’ Speaking Skill at X Grade Of MA Darul Quran Medan Tembung.”
F. The Significance of the Study

The results of this study were issued to provide useful information and advice to three parties, they are:

1. Teachers
   The results of this study are expected to be useful input for English teachers to obtain alternative solutions in encouraging students to dare to speak in English.

2. Students
   The results of this study will help and provide opportunities for students to get used to speaking English in active learning and break their worries in speaking English.

3. Next Researcher
   Finally, the findings of this study can be used by other researchers interested in English get information that is useful in conducting research.

G. Objective of the Study

The Objective of this research is to know whether giving rewards and punishment can improve students’ speaking skill for X grade students of MA Islamic boarding school of Darul Quran Medan Tembung.
CHAPTER II
LITERATURE REVIEW

A. Theoretical Framework

1. Reward and Punishment

a. The Definition of Reward and Punishment

The students’ behaviour in school or classroom is followed behaviour from their environment. Sometimes they grow up with less worship and attention. Rewards and punishment appropriate to build up their motivation related their learning, especially in English learning process. The process to apply the reinforcer to increase behaviour is called reinforcement, there are two form of reinforcement, positive and negative.

according to Mulyawan “Reward and Punishment method is an interactive learning method between teachers and students who implement a gift giving system for students who are active and correct in answering practice questions and vice versa giving penalties for students who are inactive or incorrect in answering practice questions”.5

“In holy alqur’an surat Az-zalzalah said that:

5Mulyawan, Jasa Ungguh.(2016), 45 Model Pembelajaran Spetakuler.Lampung:Ar Ruzz Media.p 242
6Ramazan sak and lec betul kubra sahin, (2016), the persistence of reward and punishment in preschool classrooms, journal of educational
The meaning: *Whoever does good as heavy as dzarrah, surely he will see (reply) it. And those who do evil as much as dzarrah, surely he will see (reply) also*.

In Islam itself there are prizes that are intended as a form of appreciation in improving student learning which is expected to improve the results from the past with this prize.

Alghazali explained that the prize as follows: at times the child has real character and does good deeds, then let him be respected and rewarded with something and should be praised in front of the people.

Referring to the statements above, when reward is given by the teacher, the student can associate acting and behaviour in feeling of happiness and usually make them doing something continuously. In other side, reward has purposed to make the student does everything more diligent to correct at to increase the score.

According to Lester that punishment is applied following a desired action, as when a student is punished after coming forward to admit cheating on an examination. The student may also associate the punishment with being honest rather than with the original offense. The result may be that the student learns not to tell the truth.

According to Djamarah "punishment is one of the educational tools that is also needed for educational greetings. Penalties are given as a result of violations,

---

crimes or mistakes made by students\textsuperscript{10}. And then according to Hamr
"punishment is suffering given or caused intentionally by educators after students
make mistakes".\textsuperscript{11}

According to Ray Flora that the way to reduce perceived need punishment
and the way to reduce illegal and destructive behaviour is to increase
reinforcement for achievement.\textsuperscript{12}

According to Ngalm Purwanto: “Hukuman adalah penderitaan yang
diberikan atau ditimbulkan dengan sengaja oleh seseorang (orang tua, guru atau
orang lainnya), sesudah terjadi pelanggaran, kejahatan atau kesalahan”\textsuperscript{13}

Punishment is suffered that gave and caused by someone (parents,
teachers, or the others), after violation, crime and mistake happened and
“Punishment is the practice of imposing something negative or unpleasant on a
person or animal or property, usually in response to disobedience, defiance, or
behaviour deemed morally wrong by individual, governmental, or religious
principles.”\textsuperscript{14}

Rasulullah Saw said:

\新车aringah\events{مُرُوا أَوْلَادَكُمْ بِالصَّلاةِ وَهُمْ أَبْنَاءُ سَبْعِ سِنِينَ ، وَاضْرِبُوهُمْ عَلَيْهَا وَهُمْ أَبْنَاءُ عَشْرٍ ، وَفَرِّقُوا بَيْنَهُمْ فِي الْمَضَاجِعِ}
(وصححه الألباني في "الأرواء", رقم 247).

The meaning: Instruct your children to pray at the age of seven, and beat
them at the age of ten. And separate their beds. ”(Revitalized by Al-Albany
in Irwa'u Ghalil, no. 247).

p.144.

\textsuperscript{11}Hamruni, (2011), Strategi pembelajaran yogyakarta insan madani p. 120

\textsuperscript{12}Stephen Ray Flora, The Power of Reinforcement, (New York: State of
University New York Press, 2004), p. 121

\textsuperscript{13}Ngalm Purwanto, Ilmu Pendidikan Teoritis dan Praktis, (Bandung: Rosda
Karya,1994), p. 46

\textsuperscript{14}http://en.wikipedia.org/wiki/Punishment
Based on the hadits above shows that, for example praying consistently the child is not praying, the child has violated the agreed rules, and the child the right to be punished by being beaten. “The rule of hitting as a punishment must also be in an educational concept. punishment is given to the child so that the child knows and is aware of the mistakes made” 15. of course, this is a form of punishment which is also very applicable in Islam. The ayat above explains that anyone who does good and mistakes get a worthy reply in accordance with the level of the mistakes made.

From the statements above that giving punishment decreases the probability that a behaviour will occur and punishment is defined as using force and physical pain to get the students to control their behaviour in classroom.

In classroom activities, negative and positive reinforce are consequences that strengthen or increase behaviour. These consequences are called punishers and the process of using these consequences to decrease behaviour is called punishment.

b. The Principle of Reward and Punishment

Principle of Reward In giving gifts or awards, there are several principles that educators must pay attention to. Among them:

1. Valuation is based on behavior rather than actors

2. Giving gifts or awards must be limited

3. Discussed agreements

4. Standardized to processes not results

---

15 Claudiu langa, (2014), rewards and punishment role in teacher student relationship from the mentor’s perspective, acta didactica napocensia 7, no 4

Punishment should be consistent and applied every time that the students engage in the misbehaviour. “Punishment is applied in teaching and learning activities for certain purposes, most generally to encourage and enforce proper behaviour as defined by society or family.”

Punishment of the children who commit violations is a positive thing that must be done by parents and teachers. This “punishment is enforced so that the child has an awareness that every act and responsibilities that must be accepted.”

When the teachers want to decrease children’s undesirable behaviour (such as teasing and hogging), punishment should be used only as a last resort and always in conjunction with providing the child information about appropriate behaviour.

Punishment must be given depending on the students' actions, not teacher’s mood on fatigue level. Give the punishment immediately after the misbehaviour to make the association between the act of wrong doing and the consequence of punishment.

Giving punishment to students in education should not be done arbitrarily according to one's wishes. Following are some principles in giving punishment are:

1. Trust first then punishment Sentencing without emotion
2. Sentence has been agreed upon
3. Punishment must be educational

---

17 ibid
19 John W. Santrock, Educational Psychology, p. 222
4. such as giving memorization or additional tasks that are expected to have positive changes.

c. **kinds of Rewards and Punishment**

In study of behaviourism the students learn that reinforces increase behaviour with praise, high test scores, and grade being common reinforces, because they are ends that result from effort. Although the use of rewards is controversial, it is still common. Some examples of rewards used in senior classroom include:

1. Non verbal communication.
2. Reward material / rewards.
3. Form of recognition.
4. Special treatment

These following types of punishment are not types of treatment. Types of punishment here are chosen because other methods of correction the students’ misbehaviour does not work. Here, punishment divided into four types, there are:

1. Psychical punishment, such as: slapping, pinch between forefinger and thumb and striking.
2. Punishment using words and sentences, such as: griping, threatening, teasing and ridiculing.
3. Stimulus psychical punishment, such as: slope, open wide of eyes and glum.
4. Inconvenient punishment, such as: the students stands up in front of class, out of class, stands beside the teacher, sits down beside the teacher or orders the student writes the sentence and rewrite for 10 times or more.  

**d. Steps to Reward and Punishment**

According to Mulyawan the steps of the Reward and Punishment learning method are as follows:

1. The teacher prepares the lesson material to be given to students.
2. The teacher gives an explanation of the subject matter to students.
3. In the middle of the explanation of the material, the teacher inserts practice questions in accordance with the subject matter being given.
4. For students who actively answer correctly get certain prizes such as stationery and other learning needs.
5. For students who make noise in class or lazy learning is given the opportunity to answer questions. If he can answer correctly, he gets a prize. Conversely, if he is wrong in answering the question and has previously been proven to make noise in the classroom, he will get a penalty according to the level of error.
6. As much as the question material is given, even more presents must be given. Likewise, on the contrary, the more students make an attribute or lazy to learn, the more punishment they give.

---

e. **Strengths and Weaknesses of the Reward and Punishment**

According to Mulyawan that Weaknesses and Strengths of Reward and Punishment learning methods are as follows:\(^{22}\)

**Strengths:**

a. Triggers students to compete
b. Student learning motivation can grow and develop optimally
c. Student learning abilities can be spread and evenly distributed to all students. This may occur due to psychological factors in competing plus the understanding of the elements of knowledge in the participants themselves.
d. The emotional ties of students with teachers can grow and develop optimally.
e. It is easy and fun.
f. For students who are lazy to learn, they are encouraged to compete.

**Weaknesses:**

a. Requires additional fees to prepare prizes
b. sometimes a psychological burden on lazy students and have a weak mental.
c. In general, active scholarship focused.

2. **Speaking Skill**

a. **Definition of Speaking**

\(^{22}\) *ibid*
Many definitions about speaking have been proposed by language. Speaking derives from the word “Speak”. According to Oxford dictionary, “Speak” means say things; talk, be able to use a language, make a speech, express ideas, feelings, etc.23 "Speaking is the verbal use of language to communicate with others."24 In addition, Hughes explains that “speaking in interactive and according to accomplish pragmatic goals through interactive discourse with other speaker of language.”25

Speaking is the productive aural/oral skill. It consists of producing systematic verbal utterances to convey meaning. Teaching speaking is sometimes considered a simple process. Commercial language schools around the world hire people with no training to teach conversation. Although “speaking is totally natural, speaking in a language other than our own is anything but simple.”26

In other hand, “Speaking is not the oral production of written language, but involves learners in the mastery of a wide range sub-skill which added together, constitute an overall competence in the spoken language”.27 It means that speaking is produced by composite of language skills. Those skill are sustaining each other, for instance; speaking skill not be separated from listening. Speaking skill preceded by listening to know new vocabulary and English sound they do not hear or know before. In fact, some English language classes only

emphasize on the importance of mastering writing and reading rather than speaking, that it brings state of imbalance then strung out students less to practice to speak English neither formally nor informally. Therefore, its need to cor other language skills in mastery and to produce good speaking. Speaker required to be able to express orally what they want to say as effectively as possible in order to convey the message or the information.

In line with the explanation above, Tarigan defines that “Speaking is a language skill that is developed in child life, which is produced by listening skill, and at that period speaking skill is learned”\(^{28}\). In other word, speaking is obtained and learned in the early. First he listens, then he speaks, and he understands. After that, he desires and express how his feeling and acting out his attitudes through speaking. Finally, he makes a written and reads its to get more meaning and more understands about the word itself.

In the TESL journal Hariyye kayi said that “speaking is the process of building and sharing meaning through the use of verbal and non verbal symbols, in a variety of context ”\(^{29}\). More detail, the ability to speak as a basic means of human communication, when we speak a great deal more than just mouth is involved another part of body such as trachea, nose, lungs and more.

Based on some opinions given above, the writer infers speaking is a form of communication of Speaking is communicative activity to produce some words or sentence to express the feelings, ideas, wish, etc. Then it ”s delivered to listener for achieving information. As human beings, especially social creature

---

\(^{28}\)Prof. Dr. Henry Guntur Tarigan,(2008) *Berbicara sebagai Suatu Keterampilan Berbahasa* Bandung: Angkasa Group, p. 3.

\(^{29}\)Harriye Kayi,(2014) *Teaching Speaking: Activities to Promote Speaking in a Second Language*, p. 1
we need to express our thoughts, opinions, or feelings in order to be accepted in social life. So that, it is important that you say is conveyed in the most effective way. How you say something can be as important as what you say in getting meaning across. Based on pieces of the verses of the Qur’an above says that Allah SWT who created man and taught the humans are good at talking. It means, our speaking ability comes from God Almighty. We as humans can only dig our potential in speaking.\footnote{A.L. Chaney, (1998), \textit{Teaching Oral Communication}, Boston:Allyn and Bacon, p.13} Allah SWT also says in Q.S Al-Mujadila: 9

\begin{quote}
\textbf{The meaning} : hai orang-orang yang beriman, apabila kamu mengadakan pembicaraan rahasia, janganlah kamu membicarakan tentang membuat dosa, permusuhan dan berbuat durhakan kepada rasul. Dan bicarakanlah tentang membuat kebajikan takwa. Dan bertakwalah kepada allah yang kepada-Nya kamu akan dikembalikan.
\end{quote}

In the meaning above that’s O you who have believed, when you converse privately, do not converse about sin and aggression and disobedience to the Messenger but converse about righteousness and piety. And fear Allah SWT, to whom you will be gathered.\footnote{Al Bayan. (2001).\textit{Al-qur’an dan Terjemahannya}. Semarang:Asy Syifa, p.1461} In this case Allah SWT exhorts to the believers not to talk about the making of sin, hostility and disobedience to the Messenger. Allah
SWT told us to talk about making a virtue and piety. Then it can be inferred that, according to the teachings of Islam, speaking is to deliver a message to someone with a good road, with a gentle word, don't talk about sin and always talks about the good things. That's the attributes of the believers if seen from the way he speaks. From the discussion above, the writer can conclude that speaking is the ability of human being to deliver the message to the listener by the good way in some context, and the listener understand about the message.

Furthermore, language is a complex system, and each system is different and requires reorganization of students thinking with lost of exposure”. It means that it needs tremendous amount of practice to be more successful language learner. In short, it can be said that speaking skill is the ability to produce utterances to express thought and convey meaning. Speaking skill is not only an ability to articulate by mouth, but to convey the meaning of idea, opinion, feeling, etc.

From the explanation above, the writer conclude the speaking is a process to convey and sharing ideas and feeling orally. Speaking also telling introduce of their self, telling about activity, telling about family, telling about expect about future and telling about planing graduation. Speaking involved some skill such grammar, vocabulary, pronunciation, comprehension, fluency and pronunciation.

b. Teaching Speaking

Teaching is not an easy job, but it is necessary one to see our students progress and know that we have helped to make it happen. Teaching speaking seems so difficult and challenging for English teacher. Speaking can be called as
oral communication and speaking is one of skill in English learning. This become one important subject that teacher should given. That’s why teachers have big challenge to enable their students to master English well, especially speaking English in class or out of the class. When teaching young learners we constantly have to keep in mind the fact that we have in front of us is a missed class varied abilities, expectations, motivation level, knowledge and last but no least, different learning styles. What is mean by teaching speaking according to Hariyye kayi in Activities to promote Speaking in a Second Language is to teach English Language learners to:

1. Produce the English speech sounds patterns
2. Use words and sentence stress, intonation patterns and the rhythm of the second language
3. Select appropriate words and sentences according to the proper social setting, audience, situation and subject matter
4. Organize their thoughts in a meaningful and logical sequence
5. Use language as a means of expressing values and judgements
6. Use the language quickly and confidently with few unnatural pauses, which is called fluency.  

In those meaning of teaching speaking above, the teacher must pay attention of some important aspects include producing sentence, intonation, rhythm and stress. Those sound productions must be meaningful because it must be produced logically from thoughts. It will give an opportunity, useful, encouragement to speak and that teachers hope students can learn to speak by speaking. In addition, we need to vary our approaches and offer as much opportunity as possible to make the whole class find a little something to hold on

---

32Harriye Kayi,(2014) Teaching Speaking: Activities to Promote Speaking in a Second Language, p. 1
to expand and grow. In brief, EFL teachers should create a classroom environment where students have real-life communication, authentic activities and meaningful task that promote oral language. Finally, the use of good activities is intrinsically enjoyable that it will stimulate students to do the task in the classroom especially in speaking task.

In many countries where English is a foreign language, a dual goal for teenagers studying in the educational system is to pass English entrance exams to enter good high schools and universities and more recently, to be able to use English as a global language. As such, much of the teaching in the junior and senior high schools is directed at being able to analyze and comprehend English to pass entrance examinations and to communicate in English with people from other parts of the world, at least at a basic level.\textsuperscript{33}

In addition, in the journal of NCRLC The Essential Language Teaching explained that “The goal of teaching speaking skills is communicative efficiency”.\textsuperscript{34} This can be defined as the ability to express oneself intelligibly, reasonably, accurately, fluently, confidently, and without too much hesitation. It means that using learners’ competence, it should be able to make them decreasing of fault in learning especially in communication. In a scope speaking skill to get the competence in decreasing of fault in communicative efficiency it means that create the activities in which learners feel less worried about speaking, less under pressure, less nervous about trying to act out and being able to communicate things. Briefly, in this case the most important goal are fluency and

\begin{footnotesize}

\textsuperscript{34}NCRLC,(2014) \textit{The Essential Language Teaching, Teaching Speaking: Goals and Techniques for Teaching Speaking}, p. 1.
\end{footnotesize}
confidence. The fluency will be created by time after time of exercises or practices. The self confidence will be created after the students have more doing exercises and practices and they will get the fluency with spontaneity and accurately.

Therefore, learners must be able to speak the target language fluently and appropriately. Herbert H. Clark stated that there are six point or assumptions in use the language in the context. Those points are:

1. Language fundamentally is used for social purposes.
2. Language use is a species of joint action.
3. Language use always involves speaker "s meaning and addressee "s understanding.
4. The basic setting for language use is face-to-face conversation.
5. Language use often has more than one layer of activity.
6. The study of language use is both a cognitive and a social science.\(^\text{35}\)

From Herbert "s opinion, the writer elaborates the goal of speaking is students able to use English language accord with a variety of language function in social context. Students should be able to use English language for doing things in social activities. From the four goals, the writer agrees with the four statements above. And she had a notion the main goal of teaching speaking in the classroom is for communication that use communicative competence. It includes speaking components, either four or five components are generally recognized in analyses of the speech process\(^\text{36}\).

1. Pronunciation

including the segmental features vowels and consonants and the stress and
the intonation patterns. We also often judge people by the way they speak, and so
learners with poor pronunciation may be judged as incompetent or lack of
knowledge, even though make the meaning of words not clear. As stated
article of AMEP Research Centre, pronunciation refers to the produc-
sounds that we use to make meaning. Pronunciation is the way for speakers’
produce clearer language when they speak. The speaker must be able to articulate
the words, and create the physical sound that carry meaning.

2. Grammar

Grammar is the sounds at
iterns, the basic units of meaning,
such as words, and the rules to combine them to form new sentences. It is
needed for students to arrange a correct sentence in conversation. Therefore,
grammar is very important in speaking because if the speaker does not mastering
grammar structure, he cannot speak English well.

3. Vocabulary

As we know, vocabulary is a basic element in language. Vocabulary is
single words, set phrases, variable phrases, phrasal verbs and idioms. It is clear
that limited vocabulary mastery makes conversation virtually impossible. Without
grammar very little can be conveyed, without vocabulary nothing can be
conveyed.

4. Fluency

pronunciation?, AMEP Research Centre, p. 1

[38] Victoria Fromkin and Robert Rodman, (1998) An Introduction to Language,
New York: Harcourt Brace College Publisher, p. 14

to Classroom Teaching, Michigan: University of Michigan, p. 2
In simple terms, fluency is the ability to talk accurately, quickly, and use the expression properly. Fluency is the ability to read, speak, or write easily, smoothly, and expressively. In other words, the speaker can read, understand, respond in a language clearly and concisely while relating meaning and context.

5. Comprehension

As stated by Laura in her article, comprehension is a complex process that has been understood and explained in a number of ways. Comprehension is defined as the ability to understand something as a knowledge and make people getting the information that they want.

Based on all statement from some resources about the goal of teaching speaking the writer summarize in communicative competence, students are able to use language is not just pattern of grammar with vocabulary items slotted in, but also involves language functions such as inviting, agreeing and disagreeing, suggesting, etc. Students also need for accuracy when talking to people in terms of the kind of language they use. Finally, students gradually become autonomous language users. It is mean that they will be able to use words and phrases fluently without very much conscious thought.

c. The Types of Speaking Activities

Today, teachers need to be active. They need to be creative in teaching, such as in preparing the materials, making lesson plan and choosing the right technique an activity will be used in teaching. Teacher need to know how to use a variety of activities in the classroom, of course, but teacher also need to be

---

41 Laura S. Pardon, (2014) What every teacher needs to know about comprehension, International Reading Association,p. 1
constantly finding out about new ways of doing things. In using the ESL/EFL classroom, there are many speaking activities and materials available as there are creative teacher. Many activities are implemented in order to increase student ability in spoken language. Speaking activities provide feedback for both teacher and learner. This feedback is beneficial to know the students’ problem during the learning process. In line with it Harmer stated that “speaking activities can give students enormous confidence and satisfaction, and with sensitive teacher guidance can encourage them into further study”. 42 It is like the following speaking activities:

1. **Acting from script**

   The teacher can ask our students to act out scenes from plays and/or their course books, sometimes filming the result. Student will often act out the dialogues they have written themselves. This frequently involves them in coming out to the front of the class.

2. **Communication Games**

   Games which are designed to provoke communication between students frequently depend on an information gap so that one student has to talk to a partner in order to solve a puzzle, draw a picture, put things in the right order, or find similarities and differences between picture.

3. **Discussion**

   One of the reason that discussion fail is that students are reluctant to give an opinion in front of the whole class, particularly if they cannot think of anything

---

to say and are not, anyway, confident of the language they might use to say it. Many students feel extremely exposed in discussion situations.

4. Prepared Talk

A popular kind of activity is the prepared talk where a student makes a presentation on a topic of their own choice. Such talks are not designed for informal spontaneous conversation; because they are prepared, they are more “writing-like”. However, if possible, students should speak from notes rather than from a script.

According Brown and Abeywickrama that purpose five types of speaking as explained in the following:

a. Imitative
b. Intensive
c. Responsive
d. Interactive
e. extensive

5. Questioners

Questioners are useful because, by being pre-planned, they ensure that both questioner and respondent have something to say to each other. Depending upon how tightly designed they are, they may well encourage the natural use of certain repetitive language patterns- and thus be situated in the middle of our communication continuum. Students can be design questioners on any topic that is appropriate. As they do so the teacher can act as a resource, helping them in the

---

43 Yenni rahmawati, (2014), syarif hidayatullah state Islamic university of jakarta.vol 1, no 2
design process. The result obtained from questioners can then form the basis for written work, discussion, or prepare talks.

From the description above, it can be inferred that as a teacher he or she want to make a communicative classroom and improve the students’ language ability. Therefore, the communicative classroom students should get as many speaking opportunities as possible and their speaking time should slowly steadily rise so as to prepare them for various communicative situations. Keeping in mind that each classroom offers a wide range of learners differing in their abilities, knowledge, confidence, motivation and learning styles, a teacher should hand over them with a reasonable environment that would help them to develop their skills. The classroom activities can help the students to develop their ability to express themselves through speech and action without omitting the component of a language course. Students can get a feedback and motivation from speaking activities as opportunities for rehearsal in their learning.

B. Related of the Study

The effectiveness of reward and punishment in classroom management is an ongoing issue for education professionals. Both tactics provide teachers with leverage when working with disruptive and self-motivated students. Before I decide whether to motivate students with rewards or manage with consequences, and I should explore both options. There are some that are similar to previous research, which will be explained as follows:

This analyze by Nur Aiza Ma’Rifah about Giving Rewards and Punishment in Improving Students’ Reading Skill (A Classroom Action Research
the researcher conducted this research in four meetings for one month. To analyze and collect the data, the researcher gained the information from interview, observation, field notes and the students’ achievement from pre-post-test after cycle I and post test II after cycle II. The result of this Classroom Action Research showed that technique of giving rewards and punishment in improving students’ reading skill at VII grade of SMP 2 May can motivate them to read text selectively and effectively that could be showed from the students who passed the KKM (65) or criteria Minimal after cycle I and cycle II. The students’ responses showed they were interested in English reading. Moreover, the result of students’ achievement showed significant improvement from cycle I to cycle II. The students’ average in pre-test was 62.58, the students’ average in post-test I was 68.23 and the students’ average in post-test II was 79.68. While the improvement score from pre-test to post-test I was 5.65, then from post-test I to post-test II was 11.45. From this result, the researcher concluded that the implementation of giving rewards and punishment at VII grade students of SMP 2 May can improve students’ reading skill effective.

this research by Puspita Kartiko Diyah, 2018 about The Implementation of Rewards and Punishments in Motivating Students in English Learning. Skripsi. English Education Department, Teacher Training and Education Faculty, Muria Kudus University. In this research, the writer applied observation and research. The writer used observation. It means to observe and to identify the kind of
rewards and punishments that the teacher implements in motivating students, and the students’ response to the implementation of those strategies toward their motivation of the fourth grade students of SDN 02 Kaliputu Kudus in English learning. This research show that the kind of rewards that implemented by the teacher in English learning were praise, respect, gift, and award mark, whereas punishments are physical punishment, the punishment with the words which were not pleasant, physical punishment with unpleasant stimulus, and punishment In the kind of activities that not pleasant. When rewards are applied appropriately, it can enhance students’ motivation. The writer found two categories of the students’ response, such as relevant response and no response. These responses used by the students when the teacher gave instructions. In showing irrelevant response, the writer captured that the students’ response did not have any relationship with the teacher’s instruction.

Another researchers that have similar focus on rewards and punishment topic such as, “Rewarded by Punishment: Reflections on the Disuse of Positive Reinforcement in Schools”by John W. Maag University of Nebraska Lincoln. This study is about the positive rewards and their reflection of the effectiveness and the misprejudice of the punishments in school.

In addition, it examines the reason why some school chooses punishments rather than the positive rewards. This article also argues for educators to plan the occurrence of positive reinforcement to increase appropriate behaviours rather than running the risk of it. Theory that found from this research can be additional
resources for the writer.\textsuperscript{44} His research is only focus on the punishment that has the opinion that punishment is better than rewards. However, this research has the same balance between rewards and punishment in the class.

Another research was conducted by Ilegbusi under the title of An Analysis of The Role of Rewards and Punishment in Motivating School Learning. This research also study about the rewards and punishment used for motivating students in the class. To be more specific it is answered some question about whether rewards and punishment facilitate or hinder learning and to what extent, how they operate to increas.\textsuperscript{45} In addition, his study also different with the researcher study because the term of punishment in here is indicating the harmful punishment and it is focus only on rewards and punishment. Whereas this study in not only focus on the role but also the impact and some kind of positive rewards and positive punishment that not harmful for the students.

Other past research comes from Gregory S Ching under the title Looking into the issues of rewards and punishment in students. This study is concerned with the way in which rewards and penalties, may or may not, motivate students to engage in learning and change their behaviour. And as the result the his research that the positive discipline approach by Rewards and punishment in practice often appeared to be on penalties for bad behaviour rather than enhancing

engagement and motivation.\textsuperscript{46} Unbalancing between rewards and punishment in his study makes the students often afraid to the teacher and the difference with this study is that it did not tell the way to deliver the rewards and punishment in the class.

The research by Pamela Oliver under the title Rewards and Punishments as Selective Incentives for Collective Action: Theoretical Investigations is about positive and negative selective incentives. To be more specific it is discuss about the importance of selective incentives, the difference between individual and collective incentive and the dynamics of positive and negative selective.\textsuperscript{47} However, it is difference with this study because his study only focus on the giving selective as reward and punishment rather that delivering and the impact of the reward and punishment.

Other study is from Claudia Langa, with the title Rewards and Punishments Role in Teacher-Student Relationship from the Mentor’s Perspective. The purpose of his study is to identify the most efficient modalities of intervening on the child’s disturbing behavior applying the punishment-reward duet. There are also some suggestions for improving pupils’ conduct by applying the most adequate modalities of reducing their undesirable actions in the school environment.\textsuperscript{48} In managing classroom, behaviour between children and Teenager

\textsuperscript{46}Ching, “Looking into the issues of rewards and punishment in students”.

\textsuperscript{48}Langa, “Rewards and Punishments Role in Teacher-Student Relationship from the Mentor’s Perspective”
is different. Moreover, this study subject is in secondary high school so that the student’s behaviour is different with the children.

However, this research focuses on analyzing some kind of positive reward and positive punishment, the implementation and the way the teachers deliver the reward and punishment.

C. Conceptual Framework

Among the four skills, speaking is increasingly important in second or foreign language settings. However in Indonesia, it is very difficult for students to communicate with other people in English effectively. Ordinarily, students must or need to communicate in English but they cannot perform the task successfully due to such possible reasons as tension or emotion, shyness and lack of effective communication skills in English. Therefore, being able to speak English efficiently the teacher must generate a need to speak, to make students to practice. In reward and punishment will suggest to be one plausible method to improve their speaking ability. In this activities, students must work together to develop a plan, resolve problem, or complete a

Giving reward and punishment can help students become more interested and involved in classroom learning by addressing problems, and exploring alternatives and creative solutions in terms of not only material learning, but also in terms of integrating the knowledge learned in action. In reward and punishment, the student, students are required to speak English even though it is not emphasized in grammar or language structure, even though it is actually better. However students are reward even though at first they only tried to speak English. And then, students will be given punishment if they do not speak
English, even if there are no students in the slightest effort to speak in English. As the result is students can upgrade their communication skills overbearingly the language functions.

However, as mentioned in the previous chapter, students of class X MA from the Darul Quran boarding school face several problems related to their speaking ability. When they try to speak English, actually the most basic thing is that they are aware of the English vocabulary that they still memorize very little, They are afraid to make mistakes, are laughed at by their friends and have confidence in their abilities. The students also think learning English is not interesting, because all this time they have only focused on memorizing the Quran and learning Arabic. So that general lessons are not too emphasized. But actually, it would be nice if English was still a part of the daily lives of students there like Arabic. Therefore I as a researcher wanted to overcome the problem by using reward and punishment strategies in the speaking class.

Based on the statement above, the writer assumed that reward and punishment may reserve for helping the students to improve their oral ability. Reward and punishment present a real life situation and make available the interesting lesson in order to the students can speak freely and confidently in front of their friend in classroom. With reward and punishment teachers can make his or her lesson classroom activity enjoyable, active, secure, and full of more exposure to language input and more choice to practice the language and develop his or her teaching method. This method expectable interesting and reduce the students boredom in learning English. Therefore, Reward and punishment is fun and motivated, the students get the chance to speak more and it is useful to extend
knowledge into feeling. Expected for the student to be able actively contribute of learning from beginning to ending. Even though at the first they expect rewards or perhaps avoid punishment. Reward and punishment is very applicable to be used for teaching-learning English especially in speaking.

D. Research Hypothesis

Based on theoretical and conc network the two hypotheses of this research can be formulated.

1. Alternative hypothesis (Hₐ)
   “there is a significant effect of reward and punishment in student speaking skill at X grade student MA Islamic Boarding School of Darul Quran Medan Tembung

2. Null hypothesis (H₀)
   There is no significant effect of reward and punishment in student speaking skill at X grade student MA Islamic Boarding School of Darul Quran Medan Tembung
CHAPTER III
RESEARCH METHODOLOGY

A. Research Design

In this research, the researcher was used quantitative research. And this study conducted by implementing an experimental research design. The research consist of two variables. The dependent variable of this study is reward and punishment while the independent of this study is student speaking skill. This study was conducted in two groups. The experimental group which receive the treatment of reward and punishment and the other hand, a control group which is treated by using conventional strategy.

This experimental design used, as Sarwono explained “the simplest research design of the true experimental research existed. This happen for respondent is truly chosen randomly and treated with having a control one”49. Both of the groups will give a pre-test and post-test with similar items. It is administered to systematically detect the effect of applying reward and punishment on students speaking skill

Research design

**B. Location of the Research**

This research was taken in MA Islamic Boarding School Of Darul Quran which was located in Medan Tembung. The school has 6 classes. There are two English teachers in the school. The research study was conducted at X grade of MA Darul Quran.
C. Population and Sample

1. Population

“Population is the objects was research”\textsuperscript{50}. “It will about all data that concerned in a scope and time that specified”\textsuperscript{51}. The population in this case is X of MA Darul Quran in the academic year 2018/2019. The school is located on Medan Tembung. The reason for choosing this school because not at all of the students are able to speak English confidently. They lack of vocabulary and fluency in English. This problem more over, has been caused by the conventional strategy by the teacher. Thus, the writer had an interest in apply reward and punishment in students speaking skill. The population of the research was distributed as follow:

- X -1: 40 students
- X -2: 35 students
- X -3: 35 students
- X -4: 35 students
- X -5: 35 students

So, the total is 180 students at X grade of MA Islamic boarding school of Darul Quran Medan

2. Sample

“Sample is small proportion of a population was select for observation and analysis”\textsuperscript{52}. One classes of the two classes selected will use as the experimental

\textsuperscript{50}Syahrum and Salim, (2011) \textit{Metodologi Penelitian Kuantitatif}, Bandung: Cipta Pustaka Media, p.113

\textsuperscript{51}Ibid

group and the other one was the control group, and based on the random sampling technique. “Random Sampling is Take sampling by randomly or without seeing feathers. This technique has the highest possibility in setting representative samples.”

Based on the random system 70 students was chosen in two classes X-4 (35) students as the experimental group and X-5 (35) students as the control group.

D. Subject of the Research

The subject of the research are the students of X of MA Darul Quran Medan. who were in the second semester by the academic year of 2018/2019. There are 2 classes and 70 students in the classroom, and each class is consist of 35 students.

E. Time of the Research

This research study was conduct in the second semester of the academic year of 2018/2019. The actions were carried out in 4 April- 4 May 2019. The observation was done on march 2019.

F. Technique of Data Collecting

In collecting the data, the writer gave test to the students in english speaking. The test gave for getting the objectives data of students’ achievement in speaking skill by using free conversation technique in that class. The writer

applied two tests: those are pre-test and post-test. Pre-test is giving before the material will teach and post-test will give in the last meeting in that class.

This research used an oral test as the instrument to collect the data specifically, the researcher applied an interview to the sample test, asked the students in the free conversation in basic speaking. This test will give to primarily identify the students’ vocabulary, structure, fluency and pronunciation.

Scoring in this research applied the theory of Brown that “were five types basic of speaking and each of them has a distinct assessment to do. Furthermore, the five indicators that will assessed in this research are grammar, vocabulary, comprehension, fluency and pronunciation.”

The detail of the components were completely explained below:

<table>

</table>
The test consists of twenty five criteria above. The writer give score “a hundred” for total correct test. Before administering the test, the writer analyzes the validity of pre-test instrument in order to find out whether the test is good to be use or not.

G. Procedure of the Research

1. Pretest

Before the treatment conducted, a pre-test is administered to the experimental and control the student. In which, they had been given the similar test. Furthermore, in the test is conducted to find out the homogeneity of the sample. It is used to determine whether the students are relatively equal in speaking achievement. This homogeneity had been analyzed from the average score of each group.

2. Teaching for Experimental Group

In this process, the teaching is conducted after administering the pre-test. The experimental group will teach by reward and punishment. Both experimental and control students had been taught with similar material and methode. So that, the researcher detailed the steps in teaching for experimental group.

3. **Teaching for Control Group**

In this stage, the students were taught by conventional method. Teacher are often apply a lecturing strategy in speaking. Then, in this procedure, the
students was taught with a conventional method. so that the result had been compared to the experimental group.

4. Post-test

After the treatment conducted, the post-test had been administered to both experimental and control group. The result of each group will analyze to discover the effect of reward and punishment on student speaking skill.

H. Technique of Analyzing Data

Score analysis is a method of data analysis from experimental design by finding the difference value of post-test and pre-test, moreover the gain score analysis is used if there is interaction / difference between group or group with pre
score. Basically the gain score is the value of the difference in scores and can be tested using t-test.55

In this research, the data is obtained from the experimental and control group. The data have been analyzed by using “t-test for independent sample”.

The formula of t-test was presented as follow:

\[
t = \frac{Mx - My}{\sqrt{\frac{\sum d_x^2 + \sum d_y^2}{N_x + N_y - 2} \left( \frac{1}{N_x} + \frac{1}{N_y} \right)}}
\]

Mx = Mean of experimental group
My = mean of control group
X = deviation square of experimental group
Y = deviation square of experimental group
Nx = total number samples of experimental group
Ny= total number samples of control group

1. Normality

Normality test was held to determine whether normal or abnormal research data or research variables. The steps of liliofors formula of normality is following:

a. creat the Ha and H0

b. account the mean variant and deviation of data by using formula:

\[
\bar{x} = \frac{\sum FiX_i}{\sum Fi}
\]

\[
S^2 = \frac{n \sum_{i=1}^{n} x_i^2 - (\sum_{i=1}^{n} x_i)^2}{n(n-1)}
\]

\[ S = \sqrt{\frac{n\sum_{i=1}^{n} x_i^2 - (\sum_{i=1}^{n} x_i)^2}{n(n-1)}} \]

c. each the data XI, X2, X3, ..., Xn are made standart value Z1, Z2, Z3, ..., Zn using the formula, 
\[ Z_{score} = \frac{X_i - \bar{x}}{s} \] (\( \bar{x} \) and \( s \) as the mean and deviation sample).

d. For each of standart coefficient using absolute normal standart distribution then calculated odds 
\[ F(Zi) = P(Z \leq Zi) \]

e. Then account the propotion of \( Z_1, Z_2, \ldots, Z_n \) which smaller or equal to 
\( Z_i \) if the propotion stated by \( S(zi) \). So, \( S(zi) = \frac{\text{banyaknya } Z_1, Z_2, \ldots, Z_n \text{ yang } \leq Z_i}{n} \)

f. Calculate \( F(Zi) - S(Zi) \) and define the absolute price Determine the largest price of the difference 
\( F(Zi) - S(Zi) \) as Lo.\textsuperscript{56}

2. Homogenity

Homogeneity Test was used to determine whether the sample variance has the same or homogeneous variance, test of homogeneity was used with the following formula

\[ F_{account} = \frac{\text{the biggest of varians}}{\text{the smallest of varians}} \]

Criteria for testing Ho is rejected if \( F \geq F_{0.05}(v1, v2) \) where \( F_{0.05}(v1, v2) \) obtained from the F distribution list with a chance of \( \alpha = 0.05 \) and \( \alpha = \)

\textsuperscript{56}Jaya Indra, (2013) Penerapan Statistik Untuk Pendidikan, Bandung: Citapustaka Media Perintis, p. 107
0.01, whereas the v1 and v2 degrees of freedom each corresponding to df numerator and denominator of the formula above.

3. Validity

Validity was defined as the extent to which an instrument measured what it claimed to measure.\(^5\) For obtain the validity of test, the face and content validity were used by adjusting the test with SKKD (Standar Kompetensi dan Kompetensi Dasar).

CHAPTER IV

FINDINGS AND DISCUSSION

A. FINDINGS

1. Description of data

This research was conducted by applying an experimental design. There were two groups of the research, namely experimental and control. The population of the research was the ten grade students of MA Islamic Boarding School of Darul Quran Medan Tembung. Class X-4 decided as the experimental group and class X-5 was decided as the control group.

The data showed that in experimental group, the data total score of pre-test is 2180 And post-test is 2800, the mean score of pre-test is 62.28 and the post-test is 80. In control group, furthermore, the total score of pre-test is 1950 and post-test is 2230, the mean score of pre-test is 55.71 and post-test is 63.71 the highest and lowest score in experimental group of pre-test are 50 and 75. And then for post-test experimental group are 60 and 95. Meanwhile of control group of pre-test are 40 and 70. And then for post-test control group are 50 and 70.

It can be concluded that the students score in experimental group was higher than the students’ score in control group.
2. Data Analysis

The total score and the mean score in experimental group showed that there was a significant improvement of the students’ score between the pre-test and score and the post-test score. The total score of the students increased 583 and the mean score of the students increased 15,75. The primary cause of the improvement of the data was caused by applying reward and punishment as the method in teaching speaking before examining the test to the student. By applying reward and punishment as the method, the student got new experiences in their speaking. It can stimulate and motivate students to become more observant and communicative.

In control group, the total score and the mean of the students showed that there was less improvement of the students’ score between the pre-test score and the post-test score. The total score of the student increased 272 and the mean score of the student increased 7,35. It was influenced by traditional teacher centered. based on data above, it proves that there are different scores between the two groups. After administering the treatment, the students` score in experimental group are higher than those in control group. The pre-test and post-test students` score, the total and the mean students` score from experimental and control group is described in the following table (4.1 and 4.2)

<table>
<thead>
<tr>
<th>Statistical calculation</th>
<th>Pre-test</th>
<th>Pre-test</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Experimental group</td>
<td>Control group</td>
</tr>
<tr>
<td>Highest</td>
<td>75</td>
<td>70</td>
</tr>
<tr>
<td>Lowest</td>
<td>50</td>
<td>45</td>
</tr>
<tr>
<td>Mean</td>
<td>61,16</td>
<td>57,40</td>
</tr>
</tbody>
</table>
Table 4.1 showed that in the experimental group the lowest score for pre-test was 50 and highest score was 75. Then, in control group the lowest score of pre-test was 45 and highest was 70.

<table>
<thead>
<tr>
<th>Statistical calculation</th>
<th>Post-test experimental group</th>
<th>Post-test Control group</th>
</tr>
</thead>
<tbody>
<tr>
<td>Highest</td>
<td>95</td>
<td>72</td>
</tr>
<tr>
<td>Lowest</td>
<td>60</td>
<td>55</td>
</tr>
<tr>
<td>Mean</td>
<td>76,91</td>
<td>64,75</td>
</tr>
</tbody>
</table>

Table 4.2 displayed that in the experimental group the lowest score of post-test was 60 and the highest was 95. On the other hand, the control group has lowest score 55 and the highest was 72.

After getting the students’ score in pre-test and post-test, it can be known that there was a significant difference of students’ ability after receiving the treatment.

a. Normality Testing

Normality testing was used to determine if a data set was well modeled by a normal distribution and to compute how likely it was for a randomized variable underlying the data set to be normally distributed.
Table 4.3
Frequency Distribution Of Pre Test In Experimental Group

</tr>
<tr>
<td></td>
<td>Total</td>
<td>35</td>
<td>23875</td>
<td>2180</td>
<td>137350</td>
</tr>
</tbody>
</table>

From the table above, It can be seen that 35 got the total of Fi (Frequency of Score in Pre Test). 2180 got from the total of FiXi (Frequency of Score in Pre Test Times Score of Pre Test). 23875 got from the total of Xi^2 (Score of Pre Test Times Two). 137350 got from the total of FiXi^2 (Frequency of Score in Pre Test and Score of Pre Test Times Two).

Based on the data above, the result of FiXi^2 is 137350 and FiXi is 2180. Then the following was the calculation of mean, variant and standard deviation.

a. Mean

\[ \bar{x} = \frac{\sum FiXi}{\sum Fi} \]

Where:

\[ \bar{x} = \text{Mean of variable x} \]
\[ \sum F_i X_i = \text{Total number of score} \]
\[ \sum F_i = \text{Number of sample} \]

So,

\[ x = \frac{2180}{35} = 62,286 \]

b. Variance

\[ s^2 = \frac{n \sum_{i=1}^{n} X_i^2 - (\sum_{i=1}^{n} X_i)^2}{n(n-1)} \]
Where:

\[ S^2 = \text{Variant} \]

\[ N = \text{Number of Sample} \]

\[ S^2 = \frac{(35)(137350)-(2180)^2}{35(35-1)} \]

\[ = \frac{54850}{1190} = 46.09 \]

3. Standar Deviation

\[ \sqrt{46.09} = 6.78 \]

After getting the calculation of mean, variant and deviation standard, then the next step was to find out the normality of the test. It means that the test was given to the students was observed by Liliefors test. The calculation of normality speaking skill can be seen in the following table:

**Table 4.4**

<table>
<thead>
<tr>
<th>No</th>
<th>X</th>
<th>Zi</th>
<th>F(Zi)</th>
<th>S(Zi)</th>
<th>F(Zi) - S(Zi)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>

<tr>
<td>4.</td>
<td>65</td>
<td>0.399798</td>
<td>0.655347</td>
<td>0.714286</td>
<td>0.058938</td>
</tr>
<tr>
<td>5.</td>
<td>70</td>
<td>1.136268</td>
<td>0.872078</td>
<td>0.971429</td>
<td>0.099351</td>
</tr>
<tr>
<td>6.</td>
<td>75</td>
<td>1.872738</td>
<td>0.969448</td>
<td>1</td>
<td>0.030552</td>
</tr>
<tr>
<td>Total</td>
<td>2180</td>
<td></td>
<td></td>
<td>0.1461</td>
<td></td>
</tr>
<tr>
<td>Mean</td>
<td>62.28</td>
<td></td>
<td></td>
<td>0.886</td>
<td></td>
</tr>
</tbody>
</table>

From the table above, It can be seen that 2180 got from the total of score. 62.28 got from the total of score divided the total of students. 0.146 got from the
higher score Standard Normal Distribution minus The Calculation of Proportion
Frequency Kumulatif divided the Total of Students. 0.886 the value of Lilliefors.

a. Finding Zscore

\[ Z_i = \frac{x - \text{mean}}{s} \]

1. \[ Z_i = \frac{50 - 62.28}{6.78} = -1.80 \]

2. \[ Z_i = \frac{55 - 62.28}{6.78} = -1.07 \]

3. \[ Z_i = \frac{60 - 62.28}{16.78} = -0.33 \]

4. \[ Z_i = \frac{65 - 62.28}{6.78} = 0.39 \]

5. \[ Z_i = \frac{70 - 62.28}{6.78} = 1.13 \]

6. \[ Z_i = \frac{75 - 62.28}{6.78} = 1.87 \]

b. Finding \( S(Z_i) \)

\[ S(Z_i) = \frac{f_{kum}}{n} \]

1. \[ S(Z_i) = \frac{3}{35} = 0.08 \]

2. \[ S(Z_i) = \frac{9}{35} = 0.25 \]

3. \[ S(Z_i) = \frac{18}{35} = 0.51 \]

4. \[ S(Z_i) = \frac{25}{35} = 0.71 \]

5. \[ S(Z_i) = \frac{34}{35} = 0.97 \]

6. \[ S(Z_i) = \frac{35}{35} = 1 \]
From the table above, it can be seen that Liliefors observation or $L_o = 0.886$ with $n = 35$ and at real level $\alpha = 0.05$ from the list of critical value of Liliefors table $L_t = 0.146$.

It is known that the coefficient of $L_o (0.886) < L_t (0.146)$. So it can be concluded that the data distribution of the student’s ability in speaking skill is normal.

**Table 4.5**

Frequency Distribution of Post Test in Experimental Group

<td>190</td>
<td>18050</td>
</tr>
<tr>
<td>Total</td>
<td>35</td>
<td></td>
<td>44875</td>
<td>2800</td>
<td>225800</td>
</tr>
</tbody>
</table>

From the table above, it can be seen that 35 got from the total of $F_i$ (Frequency of Score in Post Test in Experimental Group). 2800 got from $F_i.X_i$ (Frequency of Score in Post Test Times Score of Post Test in Experimental Group). 44875 got from $X_i^2$ (Score of Post Test Times Two in Experimental Group). 225800 got from $F_i.X_i^2$ (Frequency of Score in Post Test and Score of Post Test Times Two in Experimental Group).

Based on the data above, the result of $F_i.X_i$ is 225800 and $F_i.X_i^2$ is 2800. Then the following was the calculation of mean, variant and standard deviation.
a. Mean

\[ \overline{x} = \frac{\sum F_i X_i}{\sum F_i} \]

Where:
- \( \overline{x} \) = Mean of Variable \( x \)
- \( \sum F_i X_i \) = Total Number of Score
- \( \sum F_i \) = Number of Sample

So,

\[ \overline{x} = \frac{2800}{35} = 80 \]

b. Variance

\[ S^2 = \frac{n \sum_{i=1}^{n} x_i^2 - (\sum_{i=1}^{n} x_i)^2}{n(n-1)} \]

Where:
- \( S^2 \) = Variant
- \( N \) = Number of Sample

So,

\[ S^2 = \frac{(35)(225800)-(2800)^2}{35(35-1)} \]

\[ = \frac{63000}{1190} = 52.94 \]

c. Standard Deviation

\[ \sqrt{52.94} = 7.27 \]

After getting the calculation of mean, variance and standard deviation, the next step was to find out the normality of the test. It means that the test was given to the students was observed by Liliefors test. The calculation of normality reading comprehension can be seen in the following table:
Table 4.6

</tr>
</tbody>
</table>

TOTAL 2800
MEAN 80

\[ L_0 = 0.185714 \]

\[ L_t = 0.886 \]

From the table above, it can be seen that 2800 got from the total of score. 80 got from the total of score divided the total of students. 0.886 got from the higher score Standard Normal Distribution minus The Calculation of Proportion Frequency Kumulatif divided the Total of Students. 0.185 the value of Lilliefors.

a. Finding Zscore

\[ Z_i = \frac{x - \text{mean}}{s} \]

1. \[ Z_i = \frac{60 - 80}{7.27} = -2.74 \]

2. \[ Z_i = \frac{70 - 80}{7.27} = -1.37 \]

3. \[ Z_i = \frac{75 - 80}{7.27} = -0.68 \]

4. \[ Z_i = \frac{80 - 80}{7.27} = 0 \]

5. \[ Z_i = \frac{85 - 80}{7.27} = 0.68 \]
6. \( Z_i = \frac{90-80}{7.27} = -1.37 \)

7. \( Z_i = \frac{95-80}{7.27} = 2.06 \)

b. Finding \( S(Z_i) \)

\[ S(Z_i) = \frac{\sum k u m}{n} \]

1. \( S(Z_i) = \frac{1}{35} = 0.02 \)

2. \( S(Z_i) = \frac{4}{35} = 0.11 \)

3. \( S(Z_i) = \frac{12}{35} = 0.34 \)

4. \( S(Z_i) = \frac{24}{35} = 0.68 \)

5. \( S(Z_i) = \frac{30}{35} = 0.85 \)

6. \( S(Z_i) = \frac{33}{35} = 0.94 \)

7. \( S(Z_i) = \frac{35}{35} = 1 \)

From the table above, it can be seen that Liliefors observation or \( L_o = 0.185 \) with \( n = 35 \) and at real level \( \alpha = 0.05 \) from the list of critical value of Liliefors table \( L_t = 0.886 \).

It was known that the coefficient of \( L_o (0.185) < L_t (0.886) \). So it can be concluded that the data distribution of the student’s ability in speaking skill is normal.

Total 35 21875 1950 111000

From the table above, It can be seen that 35 got the total of Fi (Frequency of Score in Pre Test). 1950 got from the total of FiXi (Frequency of Score in Pre Test Times Score of Pre Test). 21875 got from the total of Xi² (Score of Pre Test Times Two). 111000 got from the total of FiXi² (Frequency of Score in Pre Test and Score of Pre Test Times Two). Based on the data above, the result of FiXi² is 1950 and FiXi is .

Then the following was the calculation of mean, variant and standard deviation.

a. Mean

\[ \bar{x} = \frac{\sum FiXi}{\sum Fi} \]

Where:

\[ \bar{x} \quad = \text{Mean of variable } x \]
\[ \sum FiXi \quad = \text{Total number of score} \]
\[ \sum Fi \quad = \text{Number of sample} \]

So,
\[
x = \frac{1950}{35} = 55,7143
\]

c. Varian

\[
S^2 = \frac{n\sum_{i=1}^{N} x_i^2 - (\sum_{i=1}^{N} x_i)^2}{n(n-1)}
\]

Where:

\[
S^2 = \text{Variant} \\
N = \text{Number of sample}
\]

\[
S^2 = \frac{(35 \times 111000) - (1950)^2}{35(34)}
\]

\[
= \frac{82500}{1190} = 69,32
\]

d. Standar Deviation

\[
= \sqrt{69,32} = 8,32
\]

After getting the calculation of mean, variant and deviation standard, then the next step is to find out the normality of the test. It means that the test was given to the students was observed by Liliefors test. The calculation of normality speaking skill can be seen in the following table:

<table>
<thead>
<tr>
<th>No</th>
<th>Score</th>
<th>$Z_i$</th>
<th>$F(Z_i)$</th>
<th>$S(Z_i)$</th>
<th>$F(Z_i) - S(Z_i)$</th>

<td>-0,68629</td>
<td>0,246265</td>
<td>0,342857</td>
<td>0,096592</td>
</tr>
<tr>
<td>4.</td>
<td>55</td>
<td>-0,08579</td>
<td>0,465818</td>
<td>0,514286</td>
<td>0,048468</td>
</tr>
<tr>
<td>5.</td>
<td>60</td>
<td>0,514718</td>
<td>0,696625</td>
<td>0,828571</td>
<td>0,131946</td>
</tr>
<tr>
<td>6.</td>
<td>65</td>
<td>1,115223</td>
<td>0,867623</td>
<td>0,914286</td>
<td>0,046663</td>
</tr>
<tr>
<td>7.</td>
<td>70</td>
<td>1,715728</td>
<td>0,956894</td>
<td>1</td>
<td>0,043106</td>
</tr>
<tr>
<td>TOTAL</td>
<td>1950</td>
<td></td>
<td></td>
<td>Lo= 0,131946</td>
<td></td>
</tr>
<tr>
<td>MEAN</td>
<td>55,71</td>
<td></td>
<td></td>
<td>Lt= 0,886</td>
<td></td>
</tr>
</tbody>
</table>
From the table above, it can be seen that 1950 got from the total of score. 55,71 got from the total of score divided the total of students. 0.886 got from the higher score Standard Normal Distribution minus The Calculation of Proportion Frequency Kumulatif divided the Total of Students. 0.131 the value of Lilliefors.

a. Finding Z score

\[ Z_i = \frac{x - \text{mean}}{s} \]

1. \[ Z_i = \frac{40 - 55.71}{8.32} = -1.88 \]

2. \[ Z_i = \frac{45 - 55.71}{8.32} = -1.28 \]

3. \[ Z_i = \frac{50 - 55.71}{8.32} = -0.68 \]

4. \[ Z_i = \frac{55 - 55.71}{8.32} = -0.08 \]

5. \[ Z_i = \frac{60 - 55.71}{8.32} = 0.51 \]

6. \[ Z_i = \frac{65 - 55.71}{8.32} = 1.11 \]

7. \[ Z_i = \frac{70 - 55.71}{8.32} = 1.71 \]

b. Finding S(Zi)

\[ S(Z_i) = \frac{f \, \text{kum}}{n} \]

1. \[ S(Z_i) = \frac{3}{35} = 0.08 \]

2. \[ S(Z_i) = \frac{6}{35} = 0.17 \]

3. \[ S(Z_i) = \frac{12}{35} = 0.34 \]

4. \[ S(Z_i) = \frac{18}{35} = 0.51 \]
5. \[ S(Z_i) = \frac{29}{35} = 0.82 \]

6. \[ S(Z_i) = \frac{32}{35} = 0.91 \]

7. \[ S(Z_i) = \frac{35}{35} = 1 \]

From the table above, it can be seen that Liliefors observation or \( L_o = 0.131 \) with \( n = 35 \) and at real level \( \alpha = 0.05 \) from the list of critical value of Liliefors table \( L_t = 0.886 \). It was known that the coefficient of \( L_o (0.131) < L_t (0.886) \). So it can be concluded that the data distribution of the student’s ability in speaking skill is normal.

**Table 4.9**

<td>85</td>
<td>7225</td>
</tr>
<tr>
<td>8.</td>
<td>90</td>
<td>1</td>
<td>8100</td>
<td>90</td>
<td>8100</td>
</tr>
<tr>
<td>Total</td>
<td>35</td>
<td>39200</td>
<td>2230</td>
<td>145500</td>
<td></td>
</tr>
</tbody>
</table>

From the table above , It can be seen that 35 got the total of \( F_i \) (Frequency of Score in Pre Test). 2230 got from the total of \( F_iX_i \) (Frequency of Score in Pre Test Times Score of Pre Test). 39200 got from the total of \( X_i^2 \) (Score of Pre Test Times Two). 145500 got from the total of \( F_iX_i^2 \) (Frequency of Score in Pre Test and Score of Pre Test Times Two).

Based on the data above, the result of \( F_iX_i^2 \) is 145500 and \( F_iX_i \) is 2230. Then the following was the calculation of mean, variant and standard deviation.
a. Mean

\[
\bar{x} = \frac{\sum F_i X_i}{\sum F_i}
\]

Where:
\[
\begin{align*}
\bar{x} &= \text{Mean of variable } x \\
\sum F_i X_i &= \text{Total Number of Score} \\
\sum F_i &= \text{Number of Sample}
\end{align*}
\]

So,

\[
x = \frac{2230}{35} = 63.7143
\]

b. Variance

\[
S^2 = \frac{n \sum_{i=1}^{n} x_i^2 - (\sum_{i=1}^{n} x_i)^2}{n(n-1)}
\]

Where:
\[
S^2 = \text{Variant} \\
N = \text{Number of Sample}
\]

So,

\[
S^2 = \frac{(35)(145500)-(2230)^2}{35(34)}
\]

\[
= \frac{119600}{1190} = 100.50
\]

c. Standard Deviation

\[
= \sqrt{100.50} = 10.02
\]

After getting the calculation of mean, variant and deviation standard, then the next step was to find out the normality of the test. It means that the test was given to the students was observed by Liliefors test. The calculation of normality speaking skill can be seen in the following table:
Table 4.10
Normality Testing of Post Test in Control Group

<table>
<thead>

</tr>
<tr>
<td>TOTAL</td>
<td>2230</td>
<td></td>
<td>Lo= 0.122475</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MEAN</td>
<td>63.71</td>
<td></td>
<td>Lt= 0.886</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

From the table above, it can be seen that 2230 got from the total of score. 63.71 got from the total of score divided the total of students. 0.886 got from the higher score Standard Normal Distribution minus The Calculation of Proportion Frequency Kumulatif divided the Total of Students. 0.122 the value of Lilliefors.

a. Finding Zscore

\[ Zi = \frac{x - \text{mean}}{s} \]

1. \[ Zi = \frac{50 - 63.71}{10.02} = -1.36 \]
2. \[ Zi = \frac{50 - 63.71}{10.02} = -0.86 \]
3. \[ Zi = \frac{50 - 63.71}{10.02} = -0.37 \]
4. \[ Zi = \frac{50 - 63.71}{10.02} = 0.12 \]
5. \[ Zi = \frac{50 - 63.71}{10.02} = 0.62 \]
6. \[ Zi = \frac{50 - 63.71}{10.02} = 1.12 \]
7. \[ Zi = \frac{50 - 63.71}{10.02} = 2.12 \]
8. $Z_i = \frac{50 - 63.71}{10.02} = 2.62$

b. Finding $S(Z_i)$

$$S(Z_i) = \frac{f_{kum}}{n}$$

1. $S(Z_i) = \frac{6}{35} = 0.17$

2. $S(Z_i) = \frac{11}{35} = 0.31$

3. $S(Z_i) = \frac{15}{35} = 0.42$

4. $S(Z_i) = \frac{22}{35} = 0.62$

5. $S(Z_i) = \frac{30}{35} = 0.85$

6. $S(Z_i) = \frac{33}{35} = 0.94$

7. $S(Z_i) = \frac{34}{35} = 0.97$

8. $S(Z_i) = \frac{35}{35} = 1$

From the table above, it can be seen that Liliefors observation or $L_o = 0.122$ with $n = 35$ and at real level $\alpha = 0.05$ from the list of critical value of Liliefors table $L_t = 0.889$. It was known that the coefficient of $L_o (0.122) < L_t (0.886)$. So it can be concluded that the data distribution of the student’s ability in speaking skill is normal.
b. Homogeneity Testing

\[ F_{account} = \frac{\text{the biggest of varians}}{\text{the smallest of varians}} \]

Based on the variants of both samples of pre-test found that:

\[ F_{account} = \frac{46.09}{69.32} = 0.66 \]

Then the coefficient of \( F_{obs} = 0.66 \) was compared with \( F_{table} \), where \( F_{table} \) is determined at real level = 0.05 and the numerator df = \( N = 35 \) and the denominator dk = 35. So, by using the list of critical value at F distribution was found \( F_{0.05(35,35)} = 2.30 \)

So \( F_{obs} < F_{table} \) or \( (0.66 < 2.30) \) so it can be concluded that the variant from the data is homogenous.

Based on the variants of both samples of post-test found that:

\[ F_{account} = \frac{52.94}{100.50} = 0.52 \]

Then the coefficient of \( F_{obs} = 0.50 \) was compared with \( F_{table} \), where \( F_{table} \) is determined at real level = 0.05 and the numerator df = \( N = 35 \) and the denominator dk = 35. So, by using the list of critical value at F distribution was found \( F_{0.05(35,35)} = 2.30 \)

So \( F_{obs} < F_{table} \) or \( (0.52 < 2.30) \) so it can be concluded that the variant from the data is homogenous.
c. **Hypothesis Testing**

**Table 4.11**

<td>31</td>
<td>70</td>
<td>60</td>
<td>10</td>
</tr>
</tbody>
</table>
From the table above, it can be seen that 2230 got from the total of score post test. 1950 got from the total of score pre test. 280 got from D (The total of Score Post Test minus Score Pre-Test). 63,71 got from the total of score post test divided the total of students. 55,71 got from the total of pre test divided the total of students. 8 got from the total of decrease divided the total of students.

The hypothesis testing in this research, it is used two average similarity test by using statistic, as follow:

Experiment group: $X_1 = 80 \quad S_1^2 = 208,2 \quad n = 35$

Control group : $X_2 = 63,71 \quad S_2^2 = 140,1 \quad n = 35$

With:

\[
S^2 = \frac{(n-1)S_1^2 + (n_2-1)S_2^2}{n_1 + n_2 - 2}
\]

\[
S_1^2 = \frac{(35-1)208,2 + (35-1)1}{35 + 35 - 2}
\]

\[
S_2^2 = \frac{(34)208,2 + (34)140,1}{68}
\]

\[
S^2 = \frac{7,078,8 + 4,763,4}{68}
\]

\[
S^2 = \frac{11,842,2}{68}
\]

\[
S^2 = 174,15
\]

\[
S^2 = \sqrt{174,15}
\]
\[ s^2 = 13.19 \]

So: \( \bar{x} \)

\[ t_{\text{count}} = \frac{\bar{x}_1 - \bar{x}_2}{\frac{s}{\sqrt{n_1} + \sqrt{n_2}}} \]

\[ t_{\text{count}} = \frac{80 - 63.71}{13.19} \frac{13.19}{\sqrt{\frac{1}{35} + \frac{1}{35}}} \]

\[ t_{\text{count}} = \frac{16.29}{2.949} \]

\[ t_{\text{count}} = 5.523 \]

From the calculation of the data, the value of \( t_{\text{observed}} \) was \( 5.523 \). The testing hypothesis is conducted in order to find out whether the hypothesis is accepted or rejected. The basis testing hypothesis is that the \( H_a \) is accepted if the \( t_{\text{observed}} > t_{\text{table}} \). In this study the calculation of the scores uses \( t \)-test for degree of freedom 68 (\( df = N + N - 2 \)) at the level of significant 0.05 that the critical value is 1.68. So, it can be seen that \( t_{\text{table}} = 1.56 \)

After the scores were calculated, it was found that in this study the \( t_{\text{observed}} \) is higher than \( t_{\text{table}} \). It can be seen as follow

\[ t_{\text{observed}} > t_{\text{table}} (\alpha = 0.05) \text{ with } df \ 68 \]

\[ 5.523 > 1.56 \]

**B. Discussion**

There was a significant difference on students’ achievement in speaking skill by using reward and punishment. The students that were taught by reward and punishment was higher score than were taught by conventional method.
It was explained in Chapter II that reward and punishment is learning approach which has purpose to make students become more active in language learning. The language experience approach is that it provides the classroom teacher with a coherent and defensible framework within which children can be taught to speaking.

From the calculation above it found that $t_{\text{observed}} = 5.523$ where as the $t_{\text{table}} = 1.56$. It shows that students’ achievement in reward and punishment was significant at 0.05. From the result, the researcher found that there was significant of the students’ achievement in speaking skill that were taught by reward and punishment. its means that the students’ achievement in speaking skill that were taught by reward and punishment was better than taught by conventional method.
CHAPTER V
CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research findings, the researcher concludes that there is a significant effect of applying reward and punishment on students` speaking skill. This can be seen from the calculation of t-test at the level of significance 0.05. $t_{\text{observed}} (5.523)$ is higher than $t_{\text{table}} (1.56)$. The alternative hypothesis, thus, which formulated as “there is a significant effect of reward and punishment on students` speaking skill” is accepted.

B. Suggestion

In relation to the conclusion, the researcher points out come suggestion as followings:

1. The English teacher are suggested to apply reward and punishment for enhancing students` speaking skill
2. The students are facilitated to have their optimal practices in learning by reward and punishment.
3. Other researchers who intend to use reward and punishment in teaching learning process.

Appendix A

LESSON PLAN FOR EXPERIMENTAL GROUP

School : MA Pondok Pesantren Darul Quran Medan
Subject : English
Class/sem : X/II
Aspect/Skill : Speaking
Time Allocation : 2 x 35 Minutes

1. General instructional Objectives
   a) Students are able to tell the introduce their self.
   b) Students are able to give specific information about their self
   c) Students are able to identify the meaning of new words.

2. Specific Instructional Objectives
   a) Students are able to share the experience based on the topic.
   b) Students are able to answer the questions based on the information from the information

3. Material and Source
   Material : let me introduce myself
   Source : An English Book of X Grade
4. Teaching Learning Process

a. Method

reward and punishment

b. Teaching process

1. Introduction

   a. Teacher great the students
   
   b. Teacher check the attendent list
   
   c. Teacher gives motivation and apperception
   
   d. Teacher explain the procedure of teaching and learning speaking
      by reward and punishment.

2. Core activities

   a. Teacher Giving of material for speaking, vocabulary, introduction,
      say sorry, say to thanks, and etc
   
   b. Teacher Guides the student for memorizing vocabulary,
      introduction, say sorry, say to thank. And etc
   
   c. Teacher Ask to student for practically to each other to discuss the
      student`s opinion.

   Let me introduce myself

   Introduction is an expression of introduction to know one's identity, we
   need to introduce ourselves to a clearer communication process with whom we
   talk, about what we are talking about and other conditions. Here are some
   Expression and Responses for formal introduction
Expression Introduction

a) Good morning. My name is Beny
b) Please, allow me to introduce myself.
c) May I introduce myself. My name is Kasih
d) Would you mind if I introduce myself. My name is Kasih
e) Let me introduce myself
f) I would like to introduce myself. My name is Kasih
g) Good evening. My name is Beny.
h) May I introduce myself? I’m Beny.
i) Let me introduce myself. My name is Beny.
j) How do you do? My name is Beny.

Responses

a) Good morning, how do you do?
b) How do you do, nice to meet you?
c) Oh, hello, nice to meet you
d) I am Kasih / my name’s Kasih
e) Hi /Hello Mr Beny
f) Hi, I’m Kasih. Glad to meet you.
g) Hello. My name’s Kasih. Pleased to meet you.
h) Good evening. I’m Kasih. How do you do?
i) How do you do? My name is Kasih. Nice to meet you.

Example of Introduction:
Let me introduce myself. My name is Ismail. I’m sixteen year old. I was born on October 17th 2003 in Medan, where I live till now days. I study at MA Darul Quran Medan.

Let me introduce myself. My name is ARIE DWI PRASETYO, and you can call me “ARIE”. I am one of a million babies who will be born in the Indonesia in 1994. I was born in Mojokerto on 18th October 1994. I live at Anjasmoro street, Bangun village, RT/RW: 003/001, Dk. Ploso. Subdistrict: Pungging. Regency: Mojokerto, Post Code: 61384. I am studying in SMK Negeri 5 Surabaya in the 12th grade with the skills competencies of Chemical Industry. My hobbies are cycling, listen the music, reading comics, watch movie and comedy because that all make me happy and entertain myself. I was the youngest of two sisters. I have one sister, her name is Weni Piji Lestari. She was married with one child. I have pleasant personality. I’m very friendly, sometimes I am shy if I meet new people. Sometimes I become annoying person and selfish. I like study hard and I smile a lot. :DI have a parents who very loving me. They are never mind to accept all my desire. After I am finishing my study, I want to give my parents is happiness that previous ever they give me.

The thing you should know is about the 3 main points in conveying a material:

a) Opening

b) Main Idea

c) Closing

A. Opening
a) Is the first step where you should open by saying greeting.  
example:

Good Morning, Good Afternoon, Good Evening.

b) Hi, Hello

**Example in the sentence:**

a) Good morning Mr. Rudolph, I would like to introduce myself.

b) Hi friends, I will introduce myself.

**B. Main Idea**

Is the essence of the material to be delivered. In this case the Introduction.

**What are the content in Introduction?**

a) Name

b) Place and Date Born

c) Age

d) Address

e) Status

f) Religion

g) Blood Code

h) Hobby

i) Family Background

j) Ambition

k) Inspiration
C. Closing

Is a cover sentence or often called Leave Taking

Example in Sentence:

I think that's enough. Thanks for your time and your attention. It's nice to see you

5. Closing

a) Teacher gives a chance to students to ask some questions.

b) Teacher and students make a reflection or conclusion about the topic.

c) Teacher gives a task to students

d) Remind the class to the next topic.

e) Close the class by summarizing material.

f) Every steps give the reward and punishment

6. Evaluation

Speaking Test: practice to introduce and tell theirself.

QUESTION OF PRE-TEST AND POST TEST

Name :

Class :

Instruction !

Now I’d like to hear your ideas about the topics the below. Be sure to say as much as you can in responding to question. After I ask the question, you may take a few minute to prepare your answer, and then begin speaking when you're ready.

1. Please, let’s introduce yourself!
2. Please, tell me your routine everyday!
3. Tell me about your family!
4. What is your hope in the future.?
5. What is your plan after the graduation.?
Appendix E

KEY ANSWER OF PRE-TEST AND POST-TEST

let me introduce myself. My name is ARIE DWI PRASETYO, and you can call me “ARIE”. I am one of a million babies who will be born in the Indonesia in 1994. I was born in Mojokerto on 18th October 1994. I live at Anjasmoro street, Bangun village, RT/RW: 003/001, Dk. Ploso. Subdistrict: Pungging, Regency: Mojokerto, Post Code: 61384. I am studying in SMK Negeri 5 Surabaya in the 12th grade with the skills competencies of Chemical Industry. My hobbies are cycling, listen the music, reading comics, watch movie and comedy because that all make me happy and entertain myself. I was the youngest of two sisters. I have one sister, her name is Weni Piji Lestari. She was married with one child. I have pleasant personality. I’m very friendly, sometimes I am shy if I meet new people. Sometimes I become annoying person and selfish. I like study hard and I smile a lot. DI have a parents who very loving me. They are never mind to accept all my desire. After I am finishing my study, I want to give my parents is happiness that previous ever they give me.

Appendix J

Validation Sheet Pre-Test and Post-Test

a. Identity of Lesson

1. Lesson: English
2. Skill: Speaking
3. Class/semester: X

b. Direction

1. Based on your opinion give an assessment: I (invalid), LV (Less valid), SV (simple valid), V (valid).
2. Based on your opinion give an assessment: UI (Unintelligible), LU (less understandable), U (understandable), VU (very understandable).
3. As a direction to full fill put the table, note the following:
   a. Content validity
      1. The question according to syllabus (SK/SD/Indikator)
      2. The question are formulated riefly and clearly
      3. The writing instructions are clearly written
   b. Language and writing problem
      1. The question are formulated according to grammar
      2. The question of using communicative language is easy to understand and does not lead to multiple intrepretations
4. fill in the following table with (√)
<table>
<thead>
<tr>
